PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience designing and developing scalable web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Experienced in building enterprise MIS platforms, healthcare management systems, e-commerce portals, role-based access control systems, payment integrations, and reporting dashboards. Strong expertise in MongoDB aggregation, REST API development, performance optimization, and modern frontend architecture. Passionate about delivering high-quality software solutions and solving complex business problems. Experienced in building scalable, secure, and performance-optimized web applications.

SKILLS

- **Programming Languages :** JavaScript (ES6+), TypeScript
- **Frontend :** React.js, Next.js, Redux Toolkit, HTML, CSS, TailwindCSS, Bootstrap
- **Backend :** Node.js, Express.js
- **Database :** MongoDB, Mongoose, SQL
- **DevOps** Docker, Git, GitHub
- **Other Tools & Technologies:** AWS S3, WebSockets, API Integration, Payment Integration, JWT authentication, RESTful APIs, JSON handling, Vercel and Render Deployment
- **Soft Skills:** Teamwork, Communication, Analysis

CORE COMPETENCIES

- MERN Stack Development, REST API Design, MongoDB Aggregation, Role-Based Access Control (RBAC), Payment Gateway Integration, Dashboard & Reporting Systems, Authentication & Authorization, Performance Optimization

KEY ACHIEVEMENTS

- Developed and maintained 6+ production web applications across healthcare, finance, NGO, and e-commerce domains.
- Built role-based access control systems supporting multiple user roles and approval workflows.
- Optimized MongoDB aggregation pipelines for complex financial and utilization reporting.
- Integrated payment gateways including Razorpay and Stripe.
- Designed responsive admin dashboards and reporting systems used by business stakeholders.

PROFESSIONAL EXPERIENCE

- **BridgeLabz Solutions Pvt. Ltd.** Jan 2026 - Present (Serving Notice Period - Available July 2026)
Full (MERN) Stack Developer Chennai, India
- **Project :- Real-Time Portfolio Alerts** Feb 2026 - Present
Tools: [Java, React.js, SpringBoot, Maven, SSE, Docker, Git, JWT, Google OAuth 2.0]
 - Developed a Real-Time Stock Portfolio Alerts application to track portfolio performance and trigger threshold-based notifications.
 - Built a responsive frontend using React.js and a scalable backend with Spring Boot, designing RESTful APIs for portfolio, authentication, and alert management.
 - Implemented real-time stock price updates using Server-Sent Events (SSE) to display live portfolio valuation and gain/loss tracking.
 - Designed and developed features for portfolio upload via Excel, manual stock management, and dynamic alert configuration at both stock and portfolio levels.
 - Integrated secure user authentication with encrypted credentials and efficient backend processing using Maven for dependency management.
 - Containerized the application using Docker and managed source code with Git, ensuring portability, scalability, and streamlined development workflows.
- **iAssure International Technologies Pvt. Ltd.** May 2024 - Nov 2025
Software Engineer Pune, India
- **Project :- Lupin Human Welfare and Research Foundation's MIS Software** May 2024 - Jan 2025
Tools: [Mongoose, Chart.js, AWS S3, Git]

- Developed and maintained the Lupin Foundation MIS, a comprehensive financial and approval management system designed to streamline fund allocation, approval workflows, and utilization tracking. The system featured multi-level approval management for key authorities, including Center Incharge, Senior Manager, Head-Livelihood, and Head-CSR, ensuring structured decision-making.
 - Designed multi-level approval workflows for authorities.
 - Created role-based dashboards for executives, admins, and center incharges, featuring reports and data visualizations.
 - Developed Approval vs Utilization reports used by multiple business stakeholders to monitor financial planning and fund utilization across centers.
 - Optimized MongoDB aggregation pipelines and indexing strategies, significantly improving report generation performance for large datasets.
- **Project :- Maruhi Jewelry E-Commerce Portal** Aug 2025 - Nov 2025
Tools: [Mongoose, JWT, Framer Motion, Stripe Payment API, Redux]
- Developed a full-stack Maruhi Jewelry E-commerce portal with a robust Admin Dashboard, enabling real-time management of products, orders, and users.
 - Designed and implemented Refund for Order Cancellation workflows with automated status tracking and backend logic for seamless user experience.
 - Integrated Stripe Payment Gateway API for secure checkout, along with Email and WhatsApp notifications for key order events such as dispatch, delivery, payment confirmation, and refund processing.
 - Built scalable React UIs with Redux state management for dynamic Cart handling and crafted premium, responsive interfaces for both customer and admin portals.
- **Project :- Una EcoSystems Admin Portal and WebApp** May 2025 - July 2025
Tools: [Mongoose, JWT, Framer Motion]
- Developed a premium, responsive web application and admin portal for Una Ecosystems using Next.js, Node.js, Express.js, and MongoDB, ensuring seamless integration across the stack.
 - Translated high-fidelity Figma designs into pixel-perfect UI components with Framer Motion for smooth and elegant animations across both client and admin interfaces.
 - Implemented secure and scalable REST APIs, user authentication, and role-based access control for efficient content and user management via the admin portal.
- **Project :- ShaAvi polyclinic WebApp** Jun 2024 - Sept 2025
Tools: [Next.js, Node.js, Express.js, MongoDB, Mongoose, JWT, TailwindCSS, Chart.js, WebSockets]
- Contributed to the development of a comprehensive healthcare platform using the MERN Stack and Next.js, covering key modules such as User, Doctor, Patient, Receptionist, Appointment, Billing, and Inventory Management.
 - Integrated Razorpay for seamless payment processing and implemented Revenue Sharing Contracts between doctors and the clinic, enabling transparent financial workflows.
 - Built dynamic Access Management logic with role-based permissions for doctors, receptionists, location admins, and super admins, ensuring secure module-level access via WebSockets.
 - Developed Settlement Reports and billing modules with real-time data sync, enabling accurate tracking of clinic earnings, inventory flow, and appointment-based revenue distribution.
- **Project :- Kedia Advisory Admin Portal** Oct 2024 - Dec 2024
Tools: [Mongoose, Nodemailer, Telegram API, JWT]
- Developed and maintained the Kedia Advisory Admin Portal and WebApp with secure JWT authentication, focusing on User Management, Notification Management, and System Security.
 - Built an advanced Telegram notification system using bots and string sessions, integrating Telegram API and npm packages to send alerts to users, groups, and channels.
- **Affinity Express India Pvt. Ltd.** Dec 2021 - Dec 2022
Jr. Associate Paginator Pune, India
- Developed and maintained 100+ responsive websites using HTML, CSS, JavaScript, and React.js.
 - Worked on client projects including GoDaddy and Web.com.
 - Ensured cross-browser compatibility and responsive design.
 - Collaborated with designers and project managers to deliver production-ready websites.
- **Project :- GoDaddy** Mar 2022 - Sept 2022
Tools: [HTML, CSS, JavaScript, React.js, Divi, Mobile Simulator]
- Built and customized GoDaddy client website using HTML, CSS, and JavaScript and React.js ensuring pixel-perfect implementation of provided designs and seamless responsiveness across devices.
 - Optimized site structure, improved UI/UX components, resolved layout issues, and collaborated with cross-functional teams to deliver high-quality, production-ready websites aligned with GoDaddy's brand standards.

EDUCATION

- **D. Y. Patil Institute of Technology, Pimpri, Pune-18 - SPPU** Aug 2016 - Nov 2020
B.E. - Electrical Engg.
